**UE20CS934** 

## DECEMBER 2021: END SEMESTER ASSESSMENT (ESA) M TECH DATA SCIENCE AND MACHINE LEARNING\_ SEMESTER II

## **UE20CS934 – Time Series Forecasting**

Time: 3 Hrs	Answer All C	Duestions	Max Marks: 80

		INSTRUCTIONS	
	•	All questions are compulsory.	
	•	Section A should be handwritten in the answer script provided	
	•	Section B and C are coding questions which have to be answered in the system.	
		Section A (20 marks)	
1	a)	Explain regular components of a time series.	6
	b)	What is stationarity? How will you convert non-stationary series into stationary series?	6
	c)	How will you determine the order of a moving average process? Explain.	8
		Section B (30 marks)	
2	Ana	alytics firm wants to forecast the avg spending of customers for the month of Oct 2020.	
	For	this, firm has gathered a closing stock price data for the period of Feb 2019 to Sept 2020.	
	a)	What are the number of rows and no. of cols & types of variables? (1 mark)	5
		Convert the data into time series (2 marks)	
		Check for defects in the data such as missing values, null, etc. (1 mark)	
		Visualize the time series using relevant plots. (1 mark)	
	b)	Decompose the time series and check for components of time series. (4 marks)	15
		Perform dicky fuller test to check the stationarity? What other actions will you take if	
		series is non-stationary? (3+2 marks)	
		Plot Auto Correlation and Partial Auto Correlation function? What is your inference	
		from these plots? (3+3 marks)	
	c)	Split dataset into train and test sets. Use last two months of data for testing. (2 marks)	10
		Fit ARIMA model and observe the RMSE and MAPE values of the model for test data. (8 marks)	

SRN						

		Section C (30)	
3	a)	Fit exponential smoothing model and observe the residuals, RMSE and MAPE values of	10
		the model for test data. (10 marks)	
		marks	
	b)	How would you improve the exponential smoothing model? Make the changes and fit	1:
		the final exponential smoothing model. (10 marks)	
		Analyze the residuals of this final model. Feel free to use charts or graphs to explain. (5	
		marks)	
	c)	Forecast the Avg Spending price for next 1 months using the final model? (5 marks)	5
